

ARAVINDSELVAN C

ASPIRING SOFTWARE DEVELOPER | AI APPLICATIONS

Chennai, Tamil Nadu | +91 8668147238 | aravindselvan2006@gmail.com

Portfolio | github.com/AravindS2006 | linkedin.com/in/aravindselvan-c

ECE undergraduate graduating in May 2027, with Python, C and C++ foundations. Builds AI-assisted applications for student and community needs, with practical exposure to API integration and deployment. Seeking entry-level software and AI application opportunities.

EDUCATION

Sri Sairam Engineering College, Chennai

B.E. Electronics and Communication Engineering | Sep 2023 - May 2027 (expected)

CGPA: 6.95/10

Akshaya Academy, Dindigul | Class XII, Computer Mathematics | 2023 | 86%

TECHNICAL SKILLS

Programming: Python, C, C++

Computer science: Data structures and algorithms, computer networks

Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook

Agentic coding tools: Claude, Google Antigravity, Cursor

Introductory exposure: Machine learning, pandas, scikit-learn

SELECTED PROJECTS

Application code generated with AI coding tools; contributions below describe my project work.

Edumate | Independent mobile-first ERP interface | [Source](#)

- Investigated the existing ERP API using browser developer tools and used Google Antigravity to build mobile access when the college portal was unavailable on phones.
- Deployed the application for college students; moved its backend from Vercel to Render as traffic reached about 1,000 requests/day (self-reported), keeping the frontend on Vercel.

Periyakottai Digital Seva | Community application | [Source](#)

- Built an AI-assisted Tamil/English application for village e-Seva assistance, document guidance, service requests and civic-grievance tracking.
- Included operator workflows, text-size and contrast controls, and a directory-based knowledge assistant.

Ghibli Art Generator | Hosted AI application | [Source](#)

- Used agentic coding tools to build an image-generation interface with hosted Hugging Face models, including FLUX.1-schnell and optional Gemma 3 image descriptions.

AirTon | Technical Lead | Student research project

- Technical lead of an ocular-screening prototype; worked on its machine-learning component using AI tools. Student research, without clinical-validation claims.

INTERNSHIP

Advanced SDR for LEO Satellite Signal Acquisition and Ham Radio Signals

Centre of Excellence - Space Technology, Sri Sairam Engineering College | 16 - 30 Jun 2026

- Designed a dipole antenna in a team project; used GPredict and SDR tools during the 15-day internship.

ASSESSMENTS AND LEARNING

HackerRank: [Python \(Basic\)](#), [Problem Solving \(Basic\)](#), [Software Engineer](#) assessments.

MongoDB: [Building RAG Apps Using MongoDB](#) - foundational learning badge, Sep 2026.
